

90-Day Life Reset Tracker

A structured tracker focused on visible progress over a fixed timeframe. Uses streaks, completion percentages, and progress bars to create motivation through perceived advancement.

Hidden Spending Leak Detector

A financial tracker that identifies wasted money rather than budgeting. Highlights unnecessary spending categories and quantifies monthly losses to trigger corrective action.

Daily Discipline Scorecard

A behavioural accountability tool that assigns daily scores across productivity, health, and habits. Encourages consistency through self-evaluation and performance tracking.

Decision Engine Tracker

A system that recommends tasks based on user inputs like time, energy, and priorities. Reduces decision fatigue by automating daily planning.

Future Regret Minimiser

Tracks decisions and compares short-term vs long-term outcomes. Helps users avoid regret by increasing awareness of decision consequences.

Personal Data Vault Tracker

A centralised system for storing habits, goals, and financial data. Encourages long-term use by increasing user investment and reliance.

Life Benchmark Tracker

Compares user progress against general benchmarks (savings, productivity, milestones) to create urgency and motivation through comparison.

Daily Wins Log

A simple tracker for logging small daily achievements. Builds positive reinforcement through consistent micro-wins and streak tracking.

Time Wasted Calculator

Calculates time lost to habits and projects lifetime impact. Uses fear-based motivation to encourage behavioural change.

Personal Control System Bundle

A bundled product combining multiple trackers into one system, increasing perceived value and providing a comprehensive life management toolkit.
